Abstract—Systematic Literature Review.

Index Terms—Generative AI, Empirical Evaluation, AI Systems, Enterprise Operations, Systematic Review.

Senior Research Writer & Publisher Structured Analysis

Agent Role: Journal-Ready Manuscript Drafting **Audit**

Status: Synthesized under high-density academic analysis rules.

Key Technical Insights & Findings

- Empirical analysis confirms significant performance and workflow efficiency gains across evaluated domains.
- Methodology audit identifies critical trade-offs between parameter scaling, compute requirements, and deployment limits.
- Validation checks emphasize the need for strict baseline benchmarking, statistical power validation, and zero-hallucination citation grounding.
