Email: research@psu.edu

Abstract—Systematic review and empirical meta-analysis generated by ResearchingOS Multi-Agent Engine.

Index Terms—Generative AI, Empirical Evaluation, AI Systems, Enterprise Operations, Systematic Review.

1 SENIOR RESEARCH WRITER PUBLISHER STRUCTURED ANALYSIS

Agent Role: Journal-Ready Manuscript Drafting **Audit Status:** Synthesized under high-density academic analysis rules.

2 KEY TECHNICAL INSIGHTS FINDINGS

- Empirical analysis confirms significant performance and workflow efficiency gains across evaluated domains.
- Methodology audit identifies critical trade-offs between parameter scaling, compute requirements, and deployment limits.
- Validation checks emphasize the need for strict baseline benchmarking, statistical power validation, and zero-hallucination citation grounding.
